

- Real-time 1K x 1K imaging resolution technology
- Portable
- Lightweight

---

The OEC® 9800 Plus; sets a new standard for mobile imaging systems by providing image capture, recording and management capabilities comparable to the latest fixed-room fluoroscopic imaging systems at a significantly reduced cost.

- Total redesign of current mobile C-arm equipment featuring 1K x 1K imaging resolution.
- 1K x 1K imaging resolution creates an expanded, more powerful platform.
- Intuitive touch screen control which offers simple operation of the system so even new or inexperienced users can be experts.
- AutoTrak (TM) feature automatically tracks the subject anatomy anywhere within the imaging field for true point-and-shoot ease of use.
- Backlit C-arm control panel to see in darkened operating rooms.
- Operator control panel on both sides of C-arm chassis conveniently located for operator use.
- Triple the generator power.
- Lightweight for ease in steering and maneuvering.
