MODELS 7773 HAMPERS have round, tubular rings that are seamlessly welded to three legs. A solid, round platform at the bottom acts as a bracing and protects the hamper bag from the floor. For Model 7773SS, an optional, reinforced, dome-shaped lid of high-density, white polyethylene is recommended to control airborne pathogens. MODEL 7773SS-LP comes standard with a plastic lid, while MODEL 7773SS-LPF is also foot-operated.

MODELS 7774SS ROUND HAMPER offers an 18-5/8" diameter ring, constructed from 1" stainless-steel tubing. Solid steel bag-rest supports hamper bags. MODEL 7774SS-LF TILT-TOP FOOT-OPERATED HAMPER is spring-loaded for easy opening and closing, and offers an attractive, 20"-diameter, stainless-steel lid. Non-slip pedal allows for hands-free operation. Solid steel bag rest supports hamper bags. Both hampers travel easily on 2" hard rubber casters.
